RADIANT™ WATERBORNE DRESSING

DESCRIPTION:

Radiant™ Waterborne Dressing is a water-based, body shop safe dressing formulated to produce a long-lasting, high-gloss shine on tires/rubber, leather, plastic and vinyl surfaces of vehicle interiors and exteriors. This silicone-free formula not only beautifies surfaces to make them look like new, but also protects them from drying, cracking and fading.

DIRECTIONS:

SHAKE WELL before using. Make sure that the surfaces to be treated are clean and dry. Spray or wipe onto tire surface applying a thin, even coat. Wipe onto interior surface using a microfiber towel, wax applicator pad or saturated sponge. Let surface air dry. Wipe off excess. For best results on tires, do not move vehicle until dressing is dry as excess material may be thrown off onto adjacent panels. For spray applications, dilute with water in a trigger bottle. Dilute 1:1 for use on tires and other exterior surfaces. Dilute up to 1:2 for use on interior surfaces and for a lighter gloss level or greater economy. For maximum gloss, use at full strength: saturate a sponge or microfiber cloth and wipe directly onto surface to ensure consistent coverage and appearance.

CAUTION: Dressed surfaces can be dangerously slippery. DO NOT dress pedals or steering wheels.

FEATURES & BENEFITS

Features	Benefits
Contains no silicone	<ul style="list-style-type: none">• Body shop safe & VOC compliant
High performing formula	<ul style="list-style-type: none">• Produces a long-lasting, high-gloss shine
Versatile formula	<ul style="list-style-type: none">• Can be used on both interior and exterior surfaces
Water-based	<ul style="list-style-type: none">• Dilute for variable levels of gloss and economy

PACKAGE SIZES

1 GAL	Part # 137401
5 GAL	Part # 137405
Secondary Label	Part # 831374

TECH DATA SHEET

SPECIFICATIONS:

- Colorless Liquid, Melon Scent
- pH: approx. 7
- VOC Compliant: Yes
- Density: 8.29 LBS./GAL.
- Flammability: Non-Flammable, No Flash Point

PRODUCT FAQ'S:

Q1: Is Radiant™ Waterborne Dressing body shop safe?

A1: Radiant™ Waterborne Dressing contains no silicone and is 100% body shop safe if the product is used as directed.

Q2: How long can I expect the shine to last with Radiant™ Waterborne Dressing?

A2: The shine from applying Radiant™ Waterborne Dressing could last up to 30 days under optimal conditions of everyday driving.

Q3: If my tires previously had silicone dressing on them will Radiant™ Waterborne Dressing still work?

A3: Radiant™ Waterborne Dressing was formulated to work on a tire that has previously had silicone dressing applied to it as long as the previously applied dressing has begun to wash away and no longer has a high sheen.

Q4: Why would I want to dilute the product?

A4: Presta designed Radiant™ Waterborne Dressing so that varying gloss levels can be reached on different surfaces if desired. This also provides greater economy if needed. Be sure to shake well before each use after diluting.

Q5: Can Radiant Waterborne Dressing be used on interiors and trim?

A5: Radiant™ Waterborne Dressing can be used on vehicle interiors but Presta does recommend using a minimum dilution of 1:2 for a matte finish. The surface to be treated should be checked for colorfastness with the product being applied to a microfiber towel, wax applicator pad or saturated sponge and wiped on, not sprayed directly onto the surface being treated.
