

## MALCO<sup>®</sup> OTG<sup>™</sup> WATERLESS CAR WASH (1994)

### DESCRIPTION

**Malco<sup>®</sup> OTG<sup>™</sup> Waterless Car Wash** is a safe and effective car wash spray that requires no water, bucket, hose, or sponge. It is a great solution for areas with water restrictions. Malco OTG Waterless Car Wash is an easy, safe, and quick way to get your car clean while leaving a smooth wax-like finish.

### DIRECTIONS

SHAKE WELL BEFORE USE. For best results, use plenty of clean, soft, edgeless microfiber towels. Apply to a cool, dry surface in the shade. Spray a light mist of Malco OTG Waterless Car Wash to a section of a body panel. Using a clean, soft, edgeless microfiber towel, spread product over the surface to create a thin, uniform layer of product on the surface. Using a separate clean, soft, edgeless microfiber towel, remove any excess product and buff section to a dry, high gloss shiny finish. Repeat this process for the rest of the vehicle.

### FEATURES AND BENEFITS

No water needed	Great for use in water-restricted areas and quick detailing when water is not available.
Spray on and wipe off dirt and grime from exterior surfaces.	Penetrates to remove dirt, grease, and grime
Safe to use on paint, glass, metal, and plastics.	Leaves a shiny, high-gloss finish.

### PACKAGE SIZES

- Case of 12 – 22 oz. (Part number: 199422)
- Case of 4 - 1 gallon (Part number: 199401)

## PRODUCT FAQs

### **Q1: What is a waterless car wash?**

**A1:** A waterless car wash is a high lubricity spray detailer that is used to heavily saturate a panel and then carefully wipe any dirt or road grime off to a dry shine. It is a quick and easy solution to clean a car and leave a shiny and smooth, wax-like finish.

### **Q2: Why use a waterless car wash?**

**A2:** Waterless Car Wash is a great solution for areas with water restrictions or water rationing. A waterless car wash should be used anytime you want to clean your car but do not have access to running water.

### **Q3: Is Malco OTG Waterless Car Wash safe to use on all exterior vehicle surfaces?**

**A3:** Malco OTG Waterless Car Wash is safe to use on paint, glass, metal, and plastics.

### **Q4: How do you properly use a waterless car wash?**

**A4:** Waterless car washes are generally safe for your car's paint. However, it is important to take certain precautions. When using a waterless car wash, heavily saturate the vehicle surface. Always use clean microfiber towels to prevent cross-contamination and scratching. It is highly recommended to use the product on one panel at a time.

After spraying, fold your microfiber towel in half and then in half again. After using all sides of the towel, get a fresh, clean microfiber towel to avoid transferring dirt from one panel to another panel. Note: Use different towels for your wheels and glass surfaces. In particular, wheels have more embedded debris that can damage paint.

### **Q5: Can Malco OTG Waterless Car Wash be used on vehicles with heavy dirt and grit accumulation?**

**A5:** Malco OTG Waterless Car Wash is recommended to be used on vehicles with light dirt accumulation. It is not recommended for vehicles with moderate to heavy dirt and grit accumulation as surface marring/scratching may occur.

### **Q6: What is the difference between a waterless car wash and a rinseless car wash?**

**A6:** A waterless car wash, as its name implies, is used to clean a vehicle surface without the use of water. A rinseless wash involves using a small amount of water with the solution to clean a vehicle.
